

WHO ARE WE?

FIDAL - Field Trials Beyond 5G - is a project funded as part of the European Smart Networks and Services Joint Undertakings (SNS JU) programme aimed at boosting 5G deployment and fostering Europe's technology sovereignty in 6G.

FIDAL will explore and demonstrate innovative solutions stemming from the low latency and high data capacity of beyond 5G and 6G networks. To achieve this, FIDAL will establish **3 testbeds** and **3 large-scale testing environments in Greece, Norway, and Spain** to test innovations in the fields of:

MEDIA

**PUBLIC PROTECTION AND
DISASTER RELIEF**

This will provide valuable feedback to the broader community, industry, academia and innovators before the widespread commercial deployment of evolved 5G networks throughout Europe.

OPEN CALL

we need you!

ARE YOU AN INNOVATOR IN:

- Media
- Emergency Services
- Entertainment
- Time critical applications and services

Get involved in FIDAL through our dedicated Open Calls and benefit from up to **250.000€** in funding per applicant to showcase and test your solution and shape Europe's digital future!
